

## The Discovery: *A versatile loudspeaker with twice the output of the amazing Kayak*

The Discovery uses two of the woofers used in the Kayak in an MTM arrangement and the same time alignment of the tweeter to woofers as that of the Kayak. It delivers twice the output of the Kayak in a versatile 5.5 wide by 12 high by 6.5 deep (vertical), or 12 inch wide by 5.5 inch high by 6.5 inch deep (horizontal) package.

Like all Role Audio loudspeakers, the drivers are magnetically shielded so the Discovery may be used for stereo or as front, center, or rear loudspeakers in surround and home theater systems.

You can play the Discovery horizontally, vertically or any angle in between. The close alignment of the woofers and tweeter, and a minimalist minimum phase, first order crossover, guarantee stable, accurate sound dispersion in any position.

You can use the Discovery for music or for home theater or surround sound. You can place it on a pair of stands or on bookshelves, or you can place it on top of a TV for use as a center channel loudspeaker.

As the most versatile loudspeaker made by Role Audio, the Discovery will always please with its performance and style. The Discovery is available in stunning red birch plywood or satin black lacquer cabinets.
