

## **The Sampan:** *Unconventional cure for conventional loudspeaker problems*

*uses single full range transducer*

*magnetically shielded*

*perfectly time coherent*

*perfect point source design*

*true minimum phase response*

*preserves wave form*

*reproduces entire frequency spectrum*

*true transmission line design*

*hard wired, hand soldered connections*

*Superior five-way binding posts*

The new Sampan is an innovative combination of transmission line, point source and minimum phase designs. It uses a single driver to reproduce music with incredible coherence and speed. It accurately reproduces the most delicate highs. It's midrange is pristine. It's bass response, surprising. The Sampan preserves wave form of the sound and introduces no distortion to music reproduction! It faithfully reproduces the entire audible spectrum. And its dimensions are astounding: four inches wide, four inches deep and 36 inches high. The Sampan is available in beautiful satin black lacquer or natural wood cabinets.
